

Regular radio stations play the same old stuff all the time. There are too many commercials and too many announcers that talk too much. I gave up listening to the local radio stations completely. Satellite radio has a tremendous variety with which the local radio stations cannot compete!!! I listen to it all the time! I pay for this privilege, so I can't believe the National Association of Broadcasters has the gall to dictate what I am permitted to hear!!!! The FCC had better reject the NAB petition 04-160, because they have no right to take away the kind of programming I pay for and demand and deserve!!!
